## PREVENTATIVE MAINTENANCE WILL REDUCE YOUR REPAIR COSTS

Star Microwave offers a Preventative Maintenance service to reduce repair costs of Proxim's out of warranty Lynx and Tsunami radios.

Star Microwave recommends that all Lynx and Tsunami radios manufactured previous to 2002, and have not been serviced since that year, are candidates for preventative maintenance.

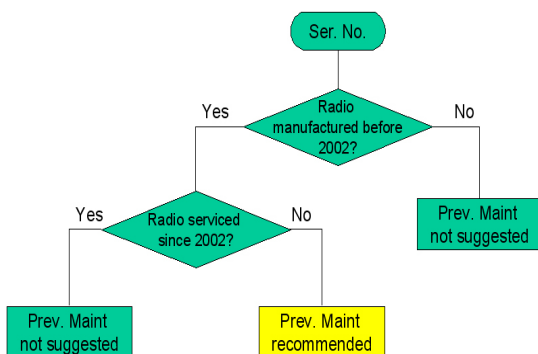

How do you know the year of manufacture? The first two digits of the serial number indicate the year the unit was manufactured.

Preventative Maintenance provides four valuable services for the Lynx and Tsunami radios:

- Pass a complete system test
- Calibrate all levels
- Implement latest Engineering Change Orders (ECOs)
- The unit is returned with Star Microwave's six (6) month standard repair warranty

### Terms & Conditions:

- Customer must indicate during the RMA process that the unit is being sent for Preventive Maintenance
- In the case of the Lynx Classic and Lynx.cp, the entire radio must be sent for preventive maintenance
- All units will be subjected to an initial diagnosis, if determined that the unit is faulty, the customer will be contacted for approval to a repair instead of preventative maintenance service
- Pricing structure:
  - \$500 for 1T1/2T1 radios
  - \$800 for 4T1/8T1/45 Mbps radios
